

HP8 is a breakthrough proprietary formulation offering a natural and effective way to maximize healthy prostate function.*

HP8 is manufactured to stringent pharmaceutical industry standards at an Australian Government GMP licensed facility, ensuring quality, potency, and purity. Each ingredient is carefully selected and tested to ensure batch-to-batch consistency and effectiveness.*

In addition, **HP8** contains free fatty acids and provides a daily dose of 200mcg of Selenium, essential for the maintenance of healthy prostate function.*

Directions for use: Take three tablets in the morning and three tablets at night, with a large glass of water. Must be taken at least one hour before or after food, and other supplements or medication.

Caution: Keep out of reach of children. Not intended for women or children. If you are taking anticoagulant drugs, or being treated for liver, heart or kidney disorders, consult a health care professional before use. Do not use if the safety band is missing or broken.
